Education

Bachelor of Technology in Computer Science and Engineering Shri Ramdeobaba College of Engineering and Management CSE CGPA: 9.29 / 10	Nagpur MH Graduating 2027
--	-------------------------------------

Coursework : Algorithms & Data Structures , Operating Systems , Computer Networks , Machine Learning , DBMS and OOPs.

Skills

Programming Languages : Java , Python , SQL , JavaScript , HTML
Frameworks and Libraries : React Js , Next Js , Tailwind Css , Express Js , Node Js , JWT , LangChain , LlamaIndex
Developer Tools : Git , Github , Vercel , VS Code , Postman , Jira , Amazon Web Services , Docker , Kubernetes
Machine Learning : RAG , PyTorch , Scikit learn , Pandas , NumPy , Matplotlib , TensorFlow
ORM and Databases : Mongoose , Prisma , MongoDB , MySQL

Work Experience

Acadme - Machine Learning Intern	Oct 2025 - Dec 2025
- Worked on building and integrating AI powered features using Python and OpenAI Chat Completions API , including text processing , prompt based workflows and basic automation tasks. - Assisted in data preprocessing , model testing and workflow optimization to enhance performance and improve output quality.	
North South Foundation - Automation Intern	Jan 2026 - Current
- Designed and implemented an event driven automation workflow using n8n , integrating Google Sheets , Meta Graph API and media assets , enabling seamless content orchestration across platforms with minimal manual intervention. - A scalable automation system that publishes content from Google Sheets to 75 Facebook and Instagram pages across multiple city chapters. Developed a status tracking mechanism in Google Sheets to ensure idempotent execution and prevent duplicate posts.	
ShadcnBlocks.com - Freelance	Feb 2026 - March 2026
- Built 58 reusable UI blocks with React js , TypeScript and Tailwind so developers can copy paste and use them right away. Published everything on ShadcnBlocks.com. Developers use and buy these blocks. - Focused on developer experience (DX) by implementing clean abstractions , minimal configuration setup and copy paste usability , improving adoption and usability for end developers.	

Projects

Medical Report Summarization Next Js , Python , MongoDB , LangChain , Groq SDK	May 2025 - June 2025
- Built an AI powered medical report analysis platform that extracts key findings from uploaded lab reports and generates simplified health summaries for patients. - Integrated OCR , embeddings and the Groq API using the Llama 3 Instant model to identify abnormal values , highlight important medical terms and provide context aware explanations from structured report data.	
AXION Next Js , Javascript , Open AI SDK , MongoDB , Node Js	Currently Working
- Built a team collaboration and delivery workspace with CQRS style orchestration , SLA driven scheduling , task management , issue tracking and RBAC enabled execution pipeline governance. Automated task and issue description generation using a GPT - 4o pipeline with prompt templates. - Integrated a shared MDX based reporting hub with DaC (Docs as Code) authoring , enabling ~3x faster team collaboration and ~40 - 60% reduction in sync latency.	

Competitive Programming

Leetcode - [My Profile](#)

Solved **800+ problems** on Leetcode with over **2303 submissions** in the past one year , maintaining a maximum streak of more than **345 days**.

Codechef - [My Profile](#)

Consistently participating in Codechef contests with a highest rating of **1344** , earning the **1 star coder** rank by solving diverse algorithmic problems and improving competitive skills.
